DCNM-LCC Camera control license

www.boschsecurity.com

The DICENTIS Camera Control software module makes it possible to interface the DICENTIS Conference System and the DICENTIS Wireless System with Bosch Onvif compliant IP cameras. It selects the activation of fixed or pre-positioned cameras (such as Bosch HD Conference Domes), so that the current active speaker can be displayed during a meeting.

Functions

When a participant's microphone is activated, the camera assigned to that position is activated. When none of the microphones is activated, an overview camera is automatically activated instead. The video image is shown on the touch-screen of the DICENTIS Multimedia device, but can also be displayed on the DICENTIS Meeting Application or on hall displays together with information about the current speaker. Configuration is easy because all Bosch Onvif compliant cameras are automatically discovered. In the DICENTIS Conference System and DICENTIS Wireless System, the DICENTIS Camera Control software module offers:

- control of Bosch Onvif cameras.
- control of the TvOne CORIOmatrix and the Kramer MV-6 video switches.

- Automatically shows current speaker on display of multimedia devices
- Interface for Bosch Onvif compliant IP (including Panasonic and Sony cameras)
- Automatically discovers Bosch Onvif cameras
- Controls HD-SDI video switchers
 - the enabling of HD-SDI video switching, so that HD-SDI video signals can be automatically switched and displayed with low-latency on one or more hall displays.

The following is also supported for the DICENTIS Conference System:

- TvOne C2-2355A in combination with TvOne S2-108HD.
- Panasonic camera support via its IP protocol: AW-HE50 (supported by Ver.2 or a later version.), AW-HE120, AW-HE60, AW-HE130, AW-HE40, AW-HE40/AW-HE40/AW-HE65/AW-HE65/AW-HE70, AW-UE70, AW-HE40/AW-HE65/AW-HE70 + AW-SFU01 (for H.264 video an external encoder is required)
- Sony camera support via its IP protocol: SRG-300SE/301SE and SRG-360SHE
