Invented for life

▶ 4.3 inch capacitive touch screen and built-in NFC reader for identifying users

▶ Option to display personalized custom logo on the touch screen

▶ Removable Battery Pack, easy to change and charge

▶ Configurable as a participant, dual-use or chairperson Wireless Device by use of web interface

▶ Functionality can be expanded with software modules without the need for hardware modification

The elegantly designed Wireless Devices (DCNM-WD and DCNM-WDE) of the DICENTIS Wireless Conference System enable participants to speak, register a request-to-speak, and listen to the speaker during a meeting.
Both devices can be easily configured as a single-use, dual-use or chairperson Wireless Device via the web interface of the Wireless Access Point (DCNM-WAP). The DCNM-WDE Wireless Device Extended enables advanced meeting efficiency due to the 4.3 inch capacitive touch screen and Near Field Communication (NFC) reader for identifying users.

Functions

General
- The Wireless Devices connect to the DCNM-WAP.
- Single-use, dual-use or chairperson can be configured via the web interface.
- Audio mute button.
- Operates in the 2.4 GHz and 5 GHz (UNII1, 2 (extended) and 3) (license free) band.

DCNM-WD
- Used for basic discussion.

DCNM-WDE

  – Voting.
  – Camera control.

Speech intelligibility
- Maximum speech intelligibility is guaranteed at all times.
- The Wireless Device connects to the DCNM-WAP.
- The Wireless Devices produce crystal-clear sound due to a very high signal-to-noise ratio and smart frequency selection.
- The loudspeaker and microphone can be active at the same time for a face-to-face meeting experience. To prevent acoustic feedback, a feedback suppressor is built-in.

Zero Interference
- Based on standard WiFi.
- Seamless automatic frequency channel switching.

- WiFi coverage area range test.
- Packet Loss Concealment.

Security
- The DICENTIS Wireless Conference System and Wireless Devices have secure connectivity using WPA2 to prevent eavesdropping and unauthorized access.
- Encryption ensures that information within the system remains confidential.

Microphones
- A socket is provided to connect the pluggable microphone (DCNM-HDMIC, DCNM-MICS or DCNM-MICL, all to be ordered separately).

Headphones and loudspeakers
- The Wireless Devices accommodate two headphone connections and controls (on the left and right-hand side), so the speaker can be heard clearly even with excessive background noise.

Battery maintenance
- Rechargeable Battery Pack (DCNM-WLIION).
- The lithium-ion Battery Pack can be removed and replaced in a matter of seconds, providing maximum flexibility in recharge scheduling.
- Smart battery management via web interface control (battery status and usage counting time).

Controls and Indicators
- On top side:
  - 4.3 inch capacitive display with touch screen (DCNM-WDE only).
  - Microphone with a red or green indicator:
    - **Red** indicates microphone is active.
    - **Green** indicates request-to-speak accepted.
  - LED indicators on device showing:
    - Microphone on state – **Red**.
    - Possible-to-speak – **White**.
    - Priority – **White** (Chairperson only).
    - Request-to-speak – **Green**.
- On the left and right hand side
  - Headphone rotary volume controls.
- On rear side:
  - Yellow out-of-range of Wireless Access Point LED indicator.
  - Red battery low LED indicator.
- Under base side:
  - Recessed, so called 'De-init,' switch to disconnect the connected Wireless Device with the Wireless Access Point (DCNM-WAP).

Interconnections
- Socket for pluggable microphone.
- Two 3.5 mm (0.14 in) headphone sockets stereo jack type.
