

# DDS 5900

# Digital Discussion System

# Sometimes less is all you need

**DDS 5900**, the new Digital Discussion System from DIS, provides you with all you need for conducting a successful discussion event.

Elegant design, simple and intuitive to use with the multiple possibilities of controlling the system, the DIS innovation team did it again!

Plug and play simplicity of the system enables the users to fully focus on the event.

The system consists of the central unit and single programmable multi-user type unit, enabling discussion, interpretation, grouping, VOX (voice activation) and encryption feature.

A system which facilitates conferencing, two language interpretation and language distribution, covers the majority of all discussion events.

For system set up, assigning of the seats, operation modes etc. DIS provides you with a web browser interface, which in addition can be used during the event for event management purposes.

For camera control and conference management a stylishly designed iPad application is available.

All the above delights stamp a clear picture that when it comes to organizing smaller size events, the DIS cost effective DDS 5900 is the right solution due to its simplicity and high intelligibility.

Whether it's used by the chairman or by delegates, or interpreter the DC 5980 P provides utmost simplicity in use..

## DDS 5900 System Components

### Web browser - Microphone control

- microphone control On/Off (speakers list, request list, last speakers list)
- system mode (select operation mode, mic parameters, loudspeaker control)

### Web browser – System set-up

- CU configuration
